

THE HORIZON

Lets investigate objects that move towards you, on a flat surface and on a curved surface. (Remember that light travels in straight lines.) Do the practical activity first.

A ship far away on a flat surface	What can the man see?
	

A ship far close on a flat surface	What can the man see?
	

A ship far away on a curved surface	What can the man see?
	

A ship close on a curved surface	What can the man see?
